Experience

Software Development Engineer Intern | Amazon Pay [Link]

May 2025 – Jul 2025

- Built scalable backend services using **Java and Spring Boot** for high-volume **financial transaction systems handling thousands of requests**.
- Designed and optimized secure REST APIs, reducing latency by **30%** and improving transaction throughput.
- Worked on **distributed systems** ensuring high availability, fault tolerance, and system reliability.
- Automated CI/CD pipelines, improving deployment stability in production environments.
- Collaborated in Agile teams, contributing to **secure and reliable payment workflows**.

Backend Engineering Intern (Springboard) | Infosys [Link]

Jan 2024 – Mar 2024

- Developed backend modules using **Java and Spring Boot** for enterprise applications.
- Optimized SQL queries on datasets exceeding **1M+ records**, improving performance significantly.
- Implemented unit testing using **JUnit**, ensuring code reliability and maintainability.
- Debugged production issues and improved system stability.

Education

Sri Krishna College of Engineering and Technology, Coimbatore

B.E. in Computer Science and Engineering

Relevant Coursework: Data Structures, Algorithms, DBMS, OS, OOP, Computer Networks

2023 – 2027

CGPA: 8.9 / 10

Projects

Fraud Detection Payment System (Banking Use Case) | [Link]

- Designed a backend payment processing system using **Spring Boot** simulating real-world banking workflows.
- Implemented rule-based **fraud detection logic** for high-value transactions (>Rs. 50K) and rapid transaction patterns.
- Detected suspicious activities such as multiple transactions within short time windows.
- Built secure REST APIs and integrated **MySQL** for efficient transaction storage.

Distributed Rate Limiter (Token Bucket Algorithm) | [Link]

- Built a thread-safe distributed rate limiter using **Java and Spring Boot**.
- Implemented **Token Bucket Algorithm** to control traffic spikes in high-load systems.
- Improved system stability and request handling by **60%**.

URL Shortener Service | [Link]

- Developed a backend service handling **1000+ requests/minute**.
- Designed **O(1) lookup architecture** for fast and efficient redirection.
- Implemented validation, access control, and scalable storage design.

Technical Skills

Programming: Java, Python, C, C++, JavaScript

CS Fundamentals: Data Structures, Algorithms, OOP

Backend: Spring Boot, REST APIs, Microservices

Databases: MySQL, SQL Optimization

Cloud & DevOps: AWS, Git, CI/CD

Testing: JUnit, Debugging

Concepts: Distributed Systems, Scalable Systems, **System Reliability**

Achievements

- Solved **400+ problems on LeetCode** and **100+ on GeeksforGeeks**.
- Selected for **Amazon SDE Internship**.
- AWS Cloud Practitioner Essentials.
- Google Cloud Computing Foundations [Link]
- Cisco CCNA [Link]
- Python Certification [Link]
